

IEEE GEOSS Workshop **XLI** Global Hydrology Interoperability and Field Applications

Place: Vancouver, BC, Canada
Vancouver Convention Center

Time: July 24, 2011 Sunday
8:30am-6:00pm

This one-day workshop will be held prior to the IGARSS symposium. It will bring together the Earth Observation community, modeling, and other water management communities to look at issues of Global Hydrology Interoperability and field Applications and the needs of the community for GEOSS-derived information. The workshop will consist of a series of presentations, breakout sessions and discussions. A report will be written with recommendations for GEOSS.
